

Welcome to your tour with elysium®

On your upcoming tour, the guide's voice will be streamed to your smartphone so you can hear him clearly. Your guide and his little helper Stream prepare your tour. For an optimal listening experience, you'll find all the important information here.

Smartphone

You need a smartphone with a browser (Chrome, Safari, ...) for the tour. Make sure you have a full battery at the start of the tour.

Internet connection

You need an internet connection - don't worry, elysium® has minimal data consumption. Your guide may provide internet access.

Headphones

To listen comfortably, we recommend headphones. When using Bluetooth headphones, please ensure that the battery is fully charged.

For Android users only

Using elysium® is very simple. As an Android user, you need a little adjustment of your battery power in your settings for a continuous touring experience. This is very easy.
